

AvanTec⁺ Armour

Vehicle Wash With Protective Coating

Code: T09

Part of Paragon's AvanTec range, Armour is an effective **pH neutral exterior cleaner** suitable for all bodywork and metal surfaces.

Armour has a **built-in aqueous polymer** which results in a sheeting effect that helps the surface to dry quicker reducing water marks. The polymer also leaves a **protective finish** that lowers the surface tension making it more difficult for soiling and contaminants to adhere to the surface.

Recommended for AvanTec Strike residue removal.

Dilution

Residue Rinsing: up to 20:1

Plant Wash: up to 200:1

Equipment

WCB/22

V29644

V526852

Application Method

- ⚡ Following the use of AvanTec Strike, apply diluted Armour directly onto the surface with a brush for even coverage.
- ⚡ Allow 1-2 minutes contact time and agitate if required.
- ⚡ Rinse thoroughly with clean water.
- ⚡ Allow to air dry.
- ⚡ Repeat the process if necessary.
